

1 **Amendment to the Specification**

2 **In the Specification:**

3 Please amend the specification as follows:

4 On Page 20, the paragraph beginning at line 19 should be replaced with the following.

5

6 Step 908 is followed by step 910, in which the palette **208** is sent to the application
7 program **202** for display on a user interface associated with the application program **202**. The
8 property browser program module **200** can send the palette **208** to an associated application
9 program **202** through the shared code library **204**. The application program **202** can receive the
10 palette **208** and display the palette **208** on an associated user interface. In addition to the palette **208**,
11 the predefined interface **210** can also be sent to the associated application program **202** through the
12 shared code library **204**. The application program **202** can then receive the predefined interface **210**
13 and display the predefined interface **210** on the associated user interface in conjunction with the
14 palette **208**. The method ends at a step 912.
